#### **Steve Fancher, Gresham Assistant City Manager**

Flood Safety District & Bond Measure – There are 27 miles levee systems along the Columbia River. These levees do not meet the Corp of Engineers standards. The levees protect residents, Portland Airport, businesses, and 2,000 acres of natural habitat and open spaces. The solution is to raise the levees and improve floodwalls in the most vulnerable areas. Upgrade pumps and other aging infrastructure. Increase resilience with

natural flood protection solutions. Congress authorized nearly \$100 million for needed improvements, so long as we provide a local match. Key steps are to issue a modest bond measure to upgrade infrastructure – anticipated for May 2024. Stand up a flood control district to deliver and oversee operations and improvements. Fund operations and maintenance. This is not a City of Gresham project it is a Multnomah County project.
